REHAU Acryl II Colour Chart

Windows
make
houses

Available in a range of RAL colours, Acryl II provides true flexibility of use. One-off coloured items are not a problem, and with Acryl II the frame and the sash, or the inside and the outside can be finished in two different colours.

The finish is durable, colour fast and weather resistant. Coating with Acryl II involves tightly controlled preparation, application of the cross-linking polyurethane acrylic by wet spray and then air curing. Acryl II coating does not affect the impact resistance of the PVC.

Like all REHAU products, Acryl II is of the highest quality, providing the perfect finish to any building.

**Metallic finish. Please refer to RAL Colour Chart for exact match.*

Colouring PVC-U window and door systems no longer presents a problem with REHAU's innovative colour coating system Acryl II. With over 150 different colours available to the specifier, PVC-U products can be coated to blend beautifully with the design of any building. Acryl II is colour fast, weather and scratch-resistant.

Acryl II Colour Chart

Originally developed by REHAU's Automotive Division, Acryl II has already proved its durability on the bumpers of prestige cars like Mercedes and BMW. A two-part acrylic coating process, it can be applied to both ready-fabricated window frames and doors or bar length window and door profile.
